ABOUT
NIRO GRANITE

*Bringing joy to people
through their living spaces.*

First established in 1979 in Switzerland, Niro Ceramic Group is a pioneer in the tiles industry producing homogeneous tiles. The Swiss heritage of delivering only high-quality products and services is kept alive and well in our company's DNA, even as we have expanded to over 100 markets worldwide.

CREATING IMPACTFUL CHANGE:
A COMMITMENT TO SUSTAINABILITY

At Niro Granite, sustainability isn’t just a value—it’s the foundation of everything we do. Leveraging cutting-edge technology and eco-conscious practices, we craft premium, environmentally friendly products that leave a lighter footprint on the planet.

Our steadfast commitment to a greener tomorrow has earned us many prestigious certifications, standing as a testament to our leadership in sustainability. With Niro Granite, you can trust that innovation, quality, and environmental stewardship are seamlessly woven together. Let’s build a sustainable future, one exceptional product at a time.

**CERTIFIED ASSURANCE,
INSPIRING CONFIDENCE
IN QUALITY**

Our products are crafted with an unwavering commitment to certified excellence. Each certification stands as a mark of distinction, ensuring that every detail consistently meets the highest standards of quality.

More than a form of recognition, these certifications reflect our dedication to responsible innovation. By proudly achieving Tingkat Komponen Dalam Negeri (TKDN) compliance, we incorporate premium local raw materials—positioning our products as a symbol of superior craftsmanship and the preferred choice for all projects that demand both quality and sustainability.

LITE COLLECTION

OUR FEATURES

OUTSTANDING OUTDOOR SPACE

The Outscape Collection is designed for exceptional durability and long-lasting performance. Built to withstand heavy use, these tiles offer high resistance to weather conditions and daily wear. Their scratch-resistant surface ensures a strong, reliable finish that stays looking great over time, making them ideal for demanding indoor and outdoor spaces.

HIGH DURABILITY

Built for strength and long-term use, Outscape tiles are designed to handle heavy loads and high-traffic areas without compromising performance.

WEATHER PROOF

Engineered to withstand diverse weather conditions, these tiles remain reliable and resilient under sun exposure, rain, and temperature changes.

SCRATCH-GUARD

Featuring a scratch-resistant surface, Outscape tiles maintain their appearance and quality even with daily wear and frequent use.

Available in Burlington Collection (page 41), Dash & Alloy Collection (page 43), Gravity Collection (page 44) and l'Pietra Collection (page 46).

CUT *DIFFERENTLY*, STYLE PERFECTLY

THE VEIN & CROSS CUT DESIGN

Characterised by soft, subtle, linear veins that runs parallel across the length of the tile that captures the natural beauty of travertine stone.

Available in Troy Collection (page 53).

A dramatic and textured appearance that showcases the natural variations of travertine in a stunning way. The surface shows a more uniform background that doesn't always display a veining pattern. The cross-cut exposes the natural pits and fossils within the travertine tile.

Versatile surfaces crafted to meet every need

Niro Granite continues to lead the way in innovation, offering a remarkable variety of surfaces tailored to every consumer's unique preferences. With striking textures and advanced finishes, each creation seamlessly combines stunning aesthetics with superior functionality. Through the perfect synergy of cutting-edge technology and exceptional design, Niro Granite transforms every space into an extraordinary masterpiece.

Silky

A LUXURIOUS VELVETY TOUCH

The latest innovation from Niro Granite tiles – the perfect blend of soft matt and polished surfaces. With its non-reflective and smooth-to-the-touch feel, Silky tiles create a remarkable aesthetic appeal for any space.

WHY SILKY ?

SMOOTH SENSATION

As smooth as a glossy surface yet soft to the touch.

SCRATCH RESISTANT

Increased resistance to scratches, wear and tear.

EASY CLEANING

Stain resistance makes for hassle-free cleaning.

Available in Dolce Collection (page 34).

SLIP STOP TILE

Introducing **THE FIRST TECHNOLOGY** in Indonesia for **ANTI-SLIP SURFACE**.

As a pioneer in porcelain tiles industry, Niro Granite successfully released Slip Stop Surface tiles in 2021; a revolutionary product that offers the best of safety and style both indoors and outdoors. Slip Stop surfaces have a special infusion that allows matt look porcelain tiles to produce friction that provides an excellent anti-slip effect in wet conditions.

CONFIDENCE IN EVERY STEP

Slip Stop technology enhances grip in wet conditions, helping reduce the risk of slipping while maintaining lasting comfort underfoot.

SMOOTH MATT FEEL

Slip Stop features a smooth, refined surface when dry, delivering visual sophistication and walking comfort without a rough or abrasive feel.

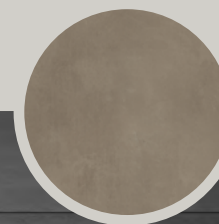

EFFORTLESS CARE, EVERYDAY

Its smooth surface helps prevent dirt build-up, making everyday cleaning easier while reducing time and maintenance costs.

Unlike other conventional anti-slip tiles, Slip-Stop tiles feel smooth to the touch when dry, making them easy to wipe and clean, and will only activate the anti-slip effect when the tile surface is wet. Slip Stop tiles are currently available in three designs; cement, stone, and terrazzo in a variety of colors and sizes - making them a versatile tile choice for indoor and outdoor spaces for both residential and commercial.

CEMENTOUS

Cementous collection features a seemingly unfinished, concrete effect that strips away all airs of pretension and excessiveness, thereby unlocking the beauty in its essence. Though edgy, the glossy-like surface and neutral color scheme soften its intensity, allowing it to look refined without being overly formal. With a utilitarian quality, Cementous tiles make a great protagonist of any contemporary space—perfect for completing that cosmopolitan appearance with character.

TILE INSTALLATION

With so many different styles, colours, patterns, surfaces and sizes, how to select the ‘right’ tile?

DURABILITY & PERFORMANCE

Refer to technical standards and PEI classification. This allows you to choose the right tiles for your application or environment, interior or exterior residential use or commercial setting.

CHOOSING A SIZE

Tiles are available in many sizes. The recent trend has been towards larger tiles for floor and wall applications. Larger tiles make a room more spacious.

RULES OF COLOUR

Lighter colours make a space appear larger. Darker colours add warmth. Neutral colour allow you to change your accessories but if you love trendy colours, go for it! Just keep in mind it will be with you a long time.

TILE FINISHES

Choosing the right tile surface is important for your environment. Matt or honed tiles are suitable for living, dining, kitchen and bathroom as they are less slippery compared to smooth or shiny polished tiles. Polished surface is more suitable for living and dining area, while structure surface will be suitable for bathroom and outdoor application.

CHOOSING A GROUT

Grout is available in a wide variety of colours. Using a grout which matches the tile tends to make the grout lines dissappear. Using a contrasting colour makes the individual tiles stand out.

TILE CARE

	STAIN	RECOMMENDATION
Food Groups	Soy Sauce, Coke, Coffee / Tea, Juice, Beer / Wine, Ice Cream, Ketchup	Alkaline base detergent.
Oil & Grease	Vegetable, Mineral, Petroleum	Alkaline base detergent.
	Wax, Rubber	Scrape off then use solvent turpentine follow by alkaline base detergent
	Lipstick / Shoe Polish	Alkaline base detergent.
	Paint (oil based)	Turpentine or thinner
	Ink	Solvent such as turpentine or thinner
	Mortar	Acidic base detergent
	Rust Stains	Diluted Hydrochloride acid or acidic base detergent
Marker	Felt Pen	Thinner
	Methylene Blue	Alkaline base detergent
	Crayon	Scrape off then use solvent turpentine follow by alkaline base detergent
Tile Grout	Cement	Diluted Hydrochloride acid
	Latex or Polymer	Solvent such as turpentine or thinner
	Epoxy	Scraper to scrape it off

INFORMATION

Sharing our expertise and knowledge

TILE INSTALLATION

- The surface must be clean, smooth, dry and free of wax and grease. Areas that damaged or uneven must be patched or leveled.
- Layout mark the center point of all four walls or the floor. First of all, layout the tiles to minimize the number of cut tiles.
- Use tile spacers for each tile set to leave equal joints between tiles. We recommend a minimum tiling gap of 3 mm. The setting time will vary from a few hours to few days and depends on the type of material or adhesive used for installation.
- When grouting, remove tile spacers and spread grout on the tile surface using a rubber grout float or squeegee. Important that you refer to adhesive package to specific instructions or precautions.
- Remove excess grout from surface immediately after grouting. Wait for a couple of minutes, depending on the specific instructions, and then remove excess grout from surface with damp sponge, clean grout residue and smooth the grout joints.

TILE CARE AFTER INSTALLATION

Initial cleaning immediately after floor installation is essential and important to remove all mortar, sand and grout residues that may be left. Niro Granite, the Swiss-Quality tile can be cleaned by scrubbing the installation with clean water and a neutral detergent and with a thorough rinsing.

If grout residue still remains, further cleaning of the tile can be accomplished by using a grout remover. Equipment recommended for more aggressive cleaning are floor scrubbers or floor buffing machines equipped with a nylon pad or brush. A wet vacuum should be used to pick up suspended grout residue and construction dirt completely.

Caution should be exercised when using acid or acid-based cleaners as they can adversely affect the grout. Avoid using hydrofluoric acid to its compounds, according to UNI-EN 176.

If acid is used for cleaning the installation, cautioned to use diluted sulfuric acid or diluted hydrochloric acid mixed in a correct mixture or concentration. It is important that before the acid solution is placed on the floor, the grout joints be thoroughly saturated with water first. Installers should wait until the grout joint has fully cured, usually 7 to 10 days before using acidic cleaners.

INFORMATION

Sharing our expertise and knowledge

DAILY MAINTENANCE

General maintenance and cleaning of Niro Granite, the Swiss-Quality tile will vary depending on the surface texture and soil load.

Generally, the cleaning should be performed by:

- 1. Sweeping or vacuuming to remove loose soil, sand or dirt contaminants.
- 2. Use damp mop with clean water.
- 3. Depending on the soil load, a more aggressive cleaning process may be required by using a neutral cleaner or a general household cleaner then followed by a thorough rinsing.

There are five steps that are critical and should always be remembered for the successful maintenance of porcelain tiles:

- 1. All spills should be cleaned as quickly as possible.
- 2. Use only the recommended dilution of detergent.
- 3. Allow proper dwelling of the detergent solution to act on the soil load. Generally 5-10 minutes is sufficient.
- 4. Scrub with a nylon pad or bristle brush.
- 5. Rinse thoroughly with clean, clear water to remove the dirty detergent solution and emulsified soil.

Rinsing is a critical step in the maintenance procedure. Use a wet vacuum, dry mop or toweling if necessary.

If dirty detergent solution is not removed and is allowed to dry on the surface, a coating will form which will be very difficult to remove.

FOR UNPOLISHED AND MATT SURFACE TILES

- 1. Sweep or vacuum the floor of all loose dirt, sand and other foreign materials.
- 2. If there is difficulty to remove contaminants on the surface of the tile, firstly identity the specific spill or contaminant as different surface contaminants require different cleaning methods and chemicals.
- 3. Saturate the floor with a mild cleaning solution and water, and allow it to dwell for 5-10 minutes. Do not allow cleaning solutions to dry. It may be best to complete small areas at a time.
- 4. Ensure detergent does not contain ‘hydrofluoric acid’ or its compounds, according to UNI-EN 176.
- 5. Remove the dirty cleaning solution and rinse the surface with clean, clear water and buff with a dry mop or towel.
- 6. For the difficult-to-remove contaminants, scrub the cleaning solution with a floor machine equipped with a nylon pad or bristle brush. For residential applications and small areas, use a hand brush or nylon pad. Remove the dirty cleaning solution and rinse the surface with clean, clear water. Use a mop or a wet vacuum.

FOR UNPOLISHED AND MATT SURFACE TILES

- 1. Sweep or vacuum the floor of all loose dirt. An untreated, dry dust mop may be more effective than a soft-bristle broom.
- 2. Mop with a mild cleaning solution. Use 50% less detergent concentrate than one would use on an unpolished floor.
- 3. Use damp mop with clean water.
- 4. Dry thoroughly with a soft cloth or buffing pad to increase the shine and prevent water spots.

INFORMATION

Sharing our expertise and knowledge

PEI RATINGS

The test is applied for glazed porcelain tiles and more applicable for floor tiles.

The rating measure the abrasive resistanceor hardness of the tile’s glaze on a scale of 0 to 5.

Class 0 (PEI 0) : No Foot Traffic

Wall tile only and should not be used on floors.

Class 1 (PEI 1) : Very Light Traffic

For tiles that are suitable for residential bathrooms with light or very low barefoot traffic.

Class 2 (PEI 2) : Light Traffic

May be used where abrasive foot traffic is minimal – such as bathrooms, bedrooms, dining rooms and living rooms.

Class 3 (PEI 3) : Light to Moderate Traffic

For floor subject to normal foot traffic and usage (including kitchens, outdoor entryways and hallways). These tiles can be recommended for all residential installations with normal foot traffic.

Class 4 (PEI 4) : Moderate to Heavy Traffic

Suitable for light to medium commercial applications and high foot traffic areas for residential application.

Class 5 (PEI 5) : Heavy Traffic

Ideally suited for all residential and heavy traffic commercial areas under normal foot traffic conditions.

SHADE VARIATION

UNIFORM
FROM TILE TO TILE

The range of colours and tones within the same shade is relatively uniform from tile to tile.

Minimal to no difference among pieces from the same production run.

SLIGHTLY NOTICEABLE
FROM TILE TO TILE

The range of colours and tones within the same shade is slightly noticeable from tile to tile.

Clearly distinguishable differences in design or pattern with similar or slight change in clour tones.

MODERATELY NOTICEABLE
FROM TILE TO TILE

The range of colours and tones within the same shade is moderately uniform from tile to tile.

Clearly distinguishable differences in design or pattern.

DISTINCTLY NOTICEABLE
FROM TILE TO TILE

The range of colours and tones within the same shade is distinctly different from tile to tile.

Random colour differences from tile to tile, so that one tile may have totally different colour from that on other tiles. Final installation can be unique.

DESCRIPTION	STANDARD TEST	MEASUREMENT UNIT	ISO STANDARD REQUIREMENT (MS ISO 13006:2020)	NIRO GRANITE
Length & Width	ISO 10545 -2	mm	NR: ±0.6%, ±2.0mm R: ±0.3%, ±1.0mm	±0.30% / Max ± 1.0mm
Thickness	ISO 10545 -2	mm	±5.0%, ±0.5mm	±5.00% / Max ± 0.5mm
Sides Straightness	ISO 10545 -2	mm	NR: ±0.5%, ±1.5mm R: ±0.3 %, ±0.8mm	±0.25% / Max ± 0.6mm
Rectangularity	ISO 10545 -2	mm	NR: ±0.5%, ±2.0mm R: ±0.3 %, ±1.5mm	±0.25% / Max ± 1.0mm
Flatness a) Centre Curvature b) Edge Curvature c) Warpage	ISO 10545 -2	mm	NR: ±0.5%, ±2.0mm R: ±0.4 %, ±1.8mm	±0.20% / Max ± 1.8mm (300x300 ±0.3%) ±0.20% / Max ± 1.8mm
	ISO 10545 -2	mm	NR: ±0.5%, ±2.0mm R: ±0.4 %, ±1.8mm	±0.20% / Max ± 1.8mm (300x300 ±0.3%) ±0.20% / Max ± 1.8mm
	ISO 10545 -2	mm	NR: ±0.5%, ±2.0mm R: ±0.4 %, ±1.8mm	±0.20% / Max ± 1.8mm (300x300 ±0.3%) ±0.20% / Max ± 1.8mm
Surface Quality	ISO 10545 -2	One Major Area of Tiles	Free from defects	Comply
Water Absorption	ISO 10545 -3	Percent Mass Fraction	Ev ≤ 0.5% Individual Max 0.6%	≤0.20%
Breaking Strength A) Thickness ≥ 7.5mm	ISO 10545 -4	N	Not less than 1300N	≥ 1300 N
B) Thickness < 7.5mm	ISO 10545 -4	N	Not less than 700N	≥ 700 N
Modulus of Rupture, in Newtons per square millimetre (Not applicable to tiles with breaking strength ≥ 3000N)	ISO 10545 -4	N/mm²	Min 35 N/mm² Individual min 32 N/mm²	≥ 35 N/mm² Individual ≥ 32 N/mm²
Abrasion Resistance a) Deep Abrasion for unglazed tiles b) Surfaces Abrasion for glazed tiles	ISO 10545 -6 ISO 10545 -7	mm³ Visual Check	Max 175 mm³ Report abrasion class and cycles passed	≤ 160 mm³ ≥ PEI 3 (Dependent on product type)*
Crazing Test (glazed tiles)	ISO 10545 -11	Visual Check	Required	No Sign of Crazing
Frost Resistance	ISO 10545 -12	Visual Check	Required	No Sign of Frost
Chemical Resistance a) Low concentrations	ISO 10545 -13	Visual Check	Manuf. To State	Class A ≥ Class B (For Polished Tile)
b) Household chemicals and swimming pool salts	ISO 10545 -13	Visual Check	Minimum B	Class A ≥ Class B (For Polished Tile)
Stain Resistance a) For unglazed tiles	ISO 10545 -14	Visual Check	Test Method Available	> Class 3 (Dependent on product type)*
b) For glazed tiles	ISO 10545 -14	Visual Check	Min Class 3	> Class 3
Slip Resistance (Excluding Polished, Lappato and Matt Satin finishing)	AS/NZS 4586 App. A	P0 to P5	Manuf. to State	Wet Pendulum ≥ P2 (Dependent on product type)*

* Refer to test report for specific test result. *R=Rectified ; *NR=Non-rectified

Each different tiles series are produced to meet different performance requirements. For specific performance, please request from Niro Granite sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristic of porcelain tile.

Due to low porosity of porcelain tiles, an Improved High Performance Cementitious adhesive in accordance to BS EN 12004 & ISO 13007-1 is highly recommended for proper installation. Products that meet this standard are available amongst leading adhesive manufacturers. Please seek expert advice from adhesive manufacturers for proper selection and application.
